British Columbia.

(To the Editor of the Toronto Globe.) Sir,-The great majority of the residents of the eastern provinces seem to fall into the natural, but grave, error of taking their opin ions about us—especially as regards politica matters—from the press of the capital evidently supposing that, as the jourtario, so the journals of Victoria reflect pub lic opinion in British Columbia. This, as I have said, is a great error. Nature has divided this Province into two great sections—the mainland and the island. In points of population these two sections are about equal ( speak of the white races), the mainland having, perhaps, the advantage by about one thousand; but while its inhabitants are seattered up and down through a large extent of territory, the residents of the island are concentrated in a comparatively small area, the majority of them being within the limits of the city of Victoria: Hence, while, the jour-nals of the mainland are small weekly or semiweekly papers, Victoria possesses two com-paratively large and important dailies; and these papers, diriving their principal support from the island, publish just what suits the

Keeping that in mind, let me speak of another subject. The big item in the terms of Union is the railway clause, and the big question here is the railway question. It is generally taken for granted that the line will come to Tete Jaune Cache; but there is great centroversy as to the route to be followed tending just as stoutly for the rosts via the valley offthe Fraser to Burrard Inlet. Com-paring the two lines, the advantages to be secured by following the former (by Bute Inlet to Esquimatt) are, that the actual termi-us of the railway would be nearer by some 60 miles to the water of the open ocean; and that the value of property in and around the capi BI-WEEKLY.—The steamer Enterprise commences her bi-weekly trips to New Weatminster to day, leaving the wharf of the Hadson

PARIS, March 27—There was a stormy debate in the National Assembly this afternoon,
growing out of a proposition to fix Monday
next as the day for the discussion upon the
Lyous municipality bill. The Left strongly
by some 150 to 200 miles; the line, from the point of crossing at Johnstone Straits to its terminus at Esquimalt, would be exposed to itself, is a harbour that could not be defended for a day against the assent of a superior torce; the line from Tete Jaune Cache to the coast would run for the most part, through a country inhost I able and unfit for settlement all the richest parts of the Province, "the garden of British Columbia," which could be depended on to supply a large local traffic, would be left "out in the cold;" and the cost of constructing the line west of the Rocky Mountains would be increased at lease fifty per cent. The advantages of the second rout by Fraser Valley to Burrard Inlet, are just the opposites of the disadvantages of the first. The line would be absolutely shorter from seem to ocean by some 150 to 200 miles; it

would be almost secure from attack; it would terminate at a harbour capable of being rea-dered, at small cost, impregnable; it would run through the best and richest portion of the Province; and its construction would cost only about one half of the sum required to build a line via Bute Inlet to Esquimait.

to build a line via Bute Injet to Esquimatt.

Now, as you will guess, the Bute injet route is the one which the islanders advocate, and, as I have said, island influence controls the leading papers, hence it is that people in the east easily enough are led, by reading the ensided statements of these papers, into the error of supposing that the Bute Injet route is the better. These facts will also furnish a key to a problem which seems to have pusseled people a little, viz—what the wire-pullers of Vancouver district enapped so eagerly at the chance of being represented by a Cablinet Minister. inet Minister.

Again, while the islanders have control of the principal organ of public opinion they are also much more active than the mainlanders. In the first place, their case in itself is much weaker, and requires more another attempt on the gavernment.

London, March 26 — The steamship City of Bristel, which sailed from Liverpool yesterday for New York, took about 100 farmers, who intend settling in Minnesota, on the line of the Northern Pacific Railroad.

The steamer Holantia left Havre to-day for New York, with passengers and the cargo of the island and away from that part of the the disabled steamer Cambria.

Another effort to deteat the Government was made in the House of Commons this afternoon, upon the passage to its second reading of the Burials Bill. The attempt, however, was unsuccessful, and the second overlooked; and they are quite confident that rending was carried by a vote of 280 against the real terminus of the Canadian Pacific will sooner or latter be at Burrard Inlet—for, say Count Bernstoff, German Ambassador to Great Britain, died at 7 o'clock this evening.
